Intel Global Human Rights Principles

Human rights are the fundamental rights, freedoms, and standards of treatment to which all people are entitled. Respect for human rights is rooted in our values and applies wherever we do business. Intel's Global Human Rights Principles (the "Policy") formalizes Intel's commitment to respect human rights and embodies common principles reflected in the United Nations (UN) Global Compact, the Universal Declaration of Human Rights, the UN Guiding Principles on Business and Human Rights, core International Labour Organization Conventions, the Organization for Economic Co-operation and Development Guidelines for Multinational Enterprises, and the laws of the countries in which we operate. At Intel, we are committed to maintaining and improving systems and processes to avoid complicity in human rights violations related to our own operations, our supply chain, and our products. Intel has established an integrated approach to managing human rights across our business. In addition to board-level oversight and senior-level Management Review Committees, we have established a cross-functional human rights steering committee. Multiple teams across the organization are responsible for conducting due diligence and implementing policies and procedures to address our salient human rights risks and support our adherence to the policy.
