

CUSTOMER ADVISORY NEW ASSEMBLY SITE

Altera has added an additional Kyocera assembly plant in San Diego, California as a qualified vendor to assemble Altera components. Packages currently being assembled at this Kyocera plant are the 68-, 84-, 100-, 192-, and 232-lead PGA. The process at Kyocera, San Diego, is the same process currently used by Altera at Kyocera's plant in Japan and continues to meet MIL-STD-883, Method 5005 Group D qualification standards. Kyocera, San Diego, has been selected because of its excellent manufacturing performance and its ability to accommodate Altera's high volume capacity requirements.

Altera does not plan to provide additional notifications for future product transfers for this Kyocera plant. If you need additional information or assistance, please contact your local Altera sales representative.
