Intel Unite® solution

Intel Unite® Solution Improves Access for Students, Teachers, and Guest Lecturers

With wire-free convenience and easy streaming of information, Anaheim Union High School District (Anaheim UHSD) in California enhances collaboration in the classroom and beyond.

“The Intel Unite® solution is the best comprehensive solution for streaming and enabling student access to information. It seamlessly brings together a variety of platforms.”

—Erik Greenwood
Chief Technology Officer
Anaheim UHSD

Challenge

Like other educational institutions, Anaheim UHSD experiences connection hassles, lost productivity, and classroom delays when trying to connect display systems and user devices in classrooms and meeting spaces. Anaheim UHSD sought an affordable solution that would enable easy-to-use, reliable content sharing across the organization.

Solution

After testing available product offerings, Anaheim UHSD chose the Intel Unite® solution as the simplest, cost-effective, and robust option for seamless connectivity and real-time collaboration. Anaheim UHSD installed Intel® Core™ vPro™ processor-based computers enabled with the Intel Unite solution. They now have the ability to stream content and manage the exchange of information from the classroom, without the need to manage multiple cable connection options. Anaheim UHSD is now expanding its deployment of the Intel Unite solution across multiple sites. Additional benefits include the ability for teachers to control content to the classroom through a moderator mode, integration with Skype* for Business to streamline meetings, and plugins for document cameras that make it easy for teachers to control cameras from their Intel Unite app.

Results:

Faculty, staff, and students get quicker access to information with the Intel Unite solution.

- More secure, wireless content sharing allows classes and meetings to start on time.
- Streaming component allows quick and easy access to information.
- Use Microsoft Windows* and Google Chrome* OS with plans to use more Chrome, iOS*, and OSX*.
- Increased use of whiteboards, document cameras, and audio/video conferencing.

Connectivity Issues Impede Productivity

Anaheim UHSD enhances dissemination of information to its students, faculty, and staff through technology advancements. As Anaheim UHSD management planned for new district-wide technology innovation, they envisioned a wire-free workplace, along with a better approach to classroom productivity and content sharing. They wanted to get rid of display adapters and improve connectivity options that would allow classroom lectures and meetings to start promptly regardless of whether they take place in a classroom or meeting room.

The Intel® Unite Solution Can Remove Barriers

“We wanted to eliminate connectivity delays from happening in the classroom. Physical display ports require matching adapters or cables to function properly. This can result in several points of failure and delay in teaching and meetings. We needed to simplify display connectivity across a variety of devices and platforms. We also needed to be able to easily stream content into the classroom. The Intel Unite solution helped eliminate these hurdles.”

Anaheim UHSD

The Intel Unite Solution: Easily Enabling Collaboration

Anaheim UHSD chose the Intel Unite solution for its simplicity, effectiveness, streaming capability, and cost. Students, faculty, and staff can now connect immediately to displays and projectors without cables. A PIN code protects meeting access, and Secure Sockets Layer encryption helps keep data safe. Content can be easily accessed and streamed. The Intel Unite solution smoothly handles the district's diverse base of Windows* and Mac OS* users.

Once connected, students, faculty, and staff gain powerful collaboration capabilities. In addition to wireless display benefits and easy streaming, users can share multiple screens at once and have several people annotate documents and presentations within the same session.

Now students and teachers can expect fewer connectivity interruptions and better collaboration for improved productivity.

The Intel Unite solution delivers immersive learning and smarter collaboration for students and teachers.

Anaheim UHSD

The Anaheim Union High School District has 31,000 students, 3,000 employees, and 21 schools with 1,250 classrooms. It is a partnership of students, parents, staff, and community that provides all students with a high-quality, well-rounded educational program in a safe, nurturing, and teaming environment that promotes:

- High academic expectations for all students and employees.
- Twenty-first century team-building skills for students to act as problem solvers and critical thinkers.
- Readiness for post-secondary education, career options, and civic and social responsibility.
